Comprehensive Library

The NetZoom Visio Stencils library is the world's largest device library of stencils and is constantly updated with new shapes to represent the latest hardware in the market

Complete Compatibility

NetZoom Visio Stencils works with Visio 2016, 2019 and 2021 and even language specific versions of Visio on Microsoft Windows

Custom Configure Slots

Drag and drop cards and modules into empty slots to configure chassis and create accurate true to life replicas of your equipment

Multi-Perspective Views

Stencils come with front, rear, 2D and 3D views

Free Custom Shapes

If there is a network equipment shape that is not in our library, we will create it for no additional charge

Embedded Manufacturer Data

All stencils include manufacturer product info, dimensions, port data and much more

Easily Connect Ports

The high quality vector graphic stencils enable users to zoom in directly to data ports and power ports for creating connections and wiring diagrams

Accurate Scalable Shapes

All stencils contain high quality scalable vector graphics that represent manufacturer specific equipment
